

Formalin-Fixed Paraffin-Embedded (FFPE) Tissue

Precision for Medicine has over 3 million FFPE samples and several million histology slides covering a full spectrum of oncologic and other medical diseases. All FFPE tissue samples are obtained from high-caliber CLIA- and CAP-certified laboratories and hospitals in the US and from our international partners. Alongside our tissue repository is an integrated, high-throughput histology laboratory with on-site pathologists performing quality control, pathologist review and annotation, and additional services upon request.

Tissue Types

- Healthy or diseased
- Excisions, resections, and biopsies

Formats

- Blocks
- Slides
- Curls
- Cores

Deeply Characterized

- Patient demographics
- Medical history, disease characterization, and outcome data
- Date of collections
- Diagnosis and subdiagnosis
- TNM, stage, and grade
- Additional data available at pathologist QC

Quality Guarantee

- CAP-graduated clinical samples
- Board-certified pathologist scoring, review, and annotation
- Consented and IRB approved for research

Additional Services

- Immunohistochemistry
- Next-generation sequencing (NGS) and nucleic acid isolation
- High-density tissue microarrays (TMAs)
- Tumor and tissue assessment in conjunction with quantitative mIF
- RNAseq or NanoString analysis
- Other platforms for custom characterization available upon request
