

Propelling Your CGTx Innovation to the Next Stage

PRECISION
ADVANCE the cell & gene therapy collective™

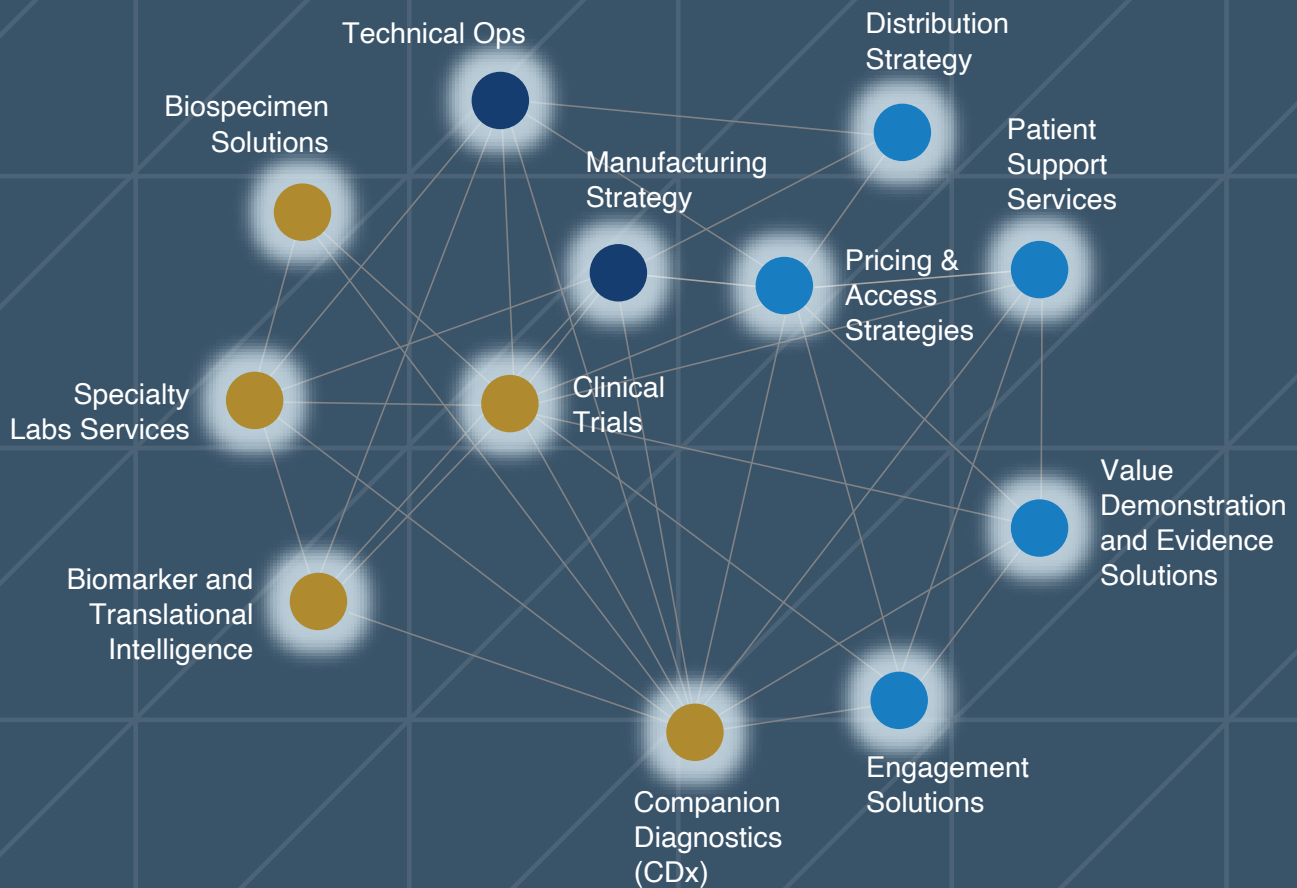

PRECISION
for medicine

PROJECT FARMA

PRECISION
value & health

Collective Intelligence:

Integrated end-to-end services propelling innovation to the next stage, from research and clinical development to manufacturing to commercialization.

Accelerate Research & Clinical Development

Delivering the global R&D services that are driving cell and gene therapy innovations

50+

research and clinical development projects supported in the last two years

The united power of trials, labs, and data combined with unparalleled experience with cell and gene therapies is accelerating greater insight and faster cell and gene therapy research and development. By integrating these critical services within a single global organization, Precision amplifies proven scientific approaches, streamlines complex processes and minimizes risk.

PIONEERING EXPERTISE

CLINICAL TRIALS

- Cell and Gene Therapy Study Experience Across Therapeutic Areas
- Trial Design and Execution to Ensure Consistency Across Crucial Processes
- Global expertise in regulatory strategy and filings for advanced therapies

SPECIALTY LAB SERVICES

- Broad Preclinical through Clinical Lab Capabilities
- Global Network for Sample Processing and Biostorage
- Scientific Leadership in Assay Development and Execution

COMPANION DIAGNOSTIC SERVICES

- Development
- Regulatory
- Commercial Strategy

BIOMARKER AND TRANSLATIONAL INTELLIGENCE

- Centralizing PK, Clinical, and Exploratory Data
- Proprietary Virtual Sample Inventory Management System

PRECISION
for medicine

Optimize Next-Gen Manufacturing

Setting the manufacturing standard for cell and gene therapy success

40+

facility builds and capital expansions with \$4B+ in investment over the past four years

Start with the team that led the industrialization of the most notable FDA-approved advanced therapies—and then created the world's largest cell and gene therapy manufacturing footprint. Precision helps cell and gene therapy trials achieve operational excellence, accelerating speed to market for life-changing therapies.

TECHNICAL OPERATIONS STRATEGY

- Due Diligence, Pipeline Evaluation and Mobilization
- Make Vs. Buy Business Case Analysis and Execution
- Gmp Infrastructure Startup and Support
- Program Management
- Business Infrastructure

MANUFACTURING EXECUTION

- Capital Projects, Facility Builds, Tech Transfers
- Engineering, Automation and Serialization, Track and Trace
- Validation
- Quality, Regulatory, and Compliance
- Reliability, Maintenance, and Asset Management

PROJECT FARMA
A PRECISION FOR MEDICINE COMPANY

Drive Commercial Success

Charting the path to patient access for cell and gene therapy

70%+

of approved cell and gene therapies commercially launched

When patients are waiting for life-altering treatments, every milestone is critical, Precision applies demonstrated expertise from quantifying the burden of disease for narrow patient populations to demonstrating and communicating the economic and clinical value of cell and gene therapies, traversing the commercialization landscapes to improve or save patient lives.

EVIDENCE SOLUTIONS AND VALUE DEMONSTRATION

- Burden of Illness, Treatment Patterns, Cost of Care
- Network Meta-analysis and Indirect Treatment Comparisons
- Health Economic Models
- HTA Engagement and Real-World Evidence

PRICING AND ACCESS STRATEGY

- Market Access Strategy
- Patient Access Schemes and Innovative Payment Models
- Distribution Strategies

ENGAGEMENT SOLUTIONS

- Scientific Communications
- Patient, Payer, Provider Engagement
- Brand Strategy and Promotion

PRECISION
